

 netmon  
**eSIM Module**

# eSIM Module

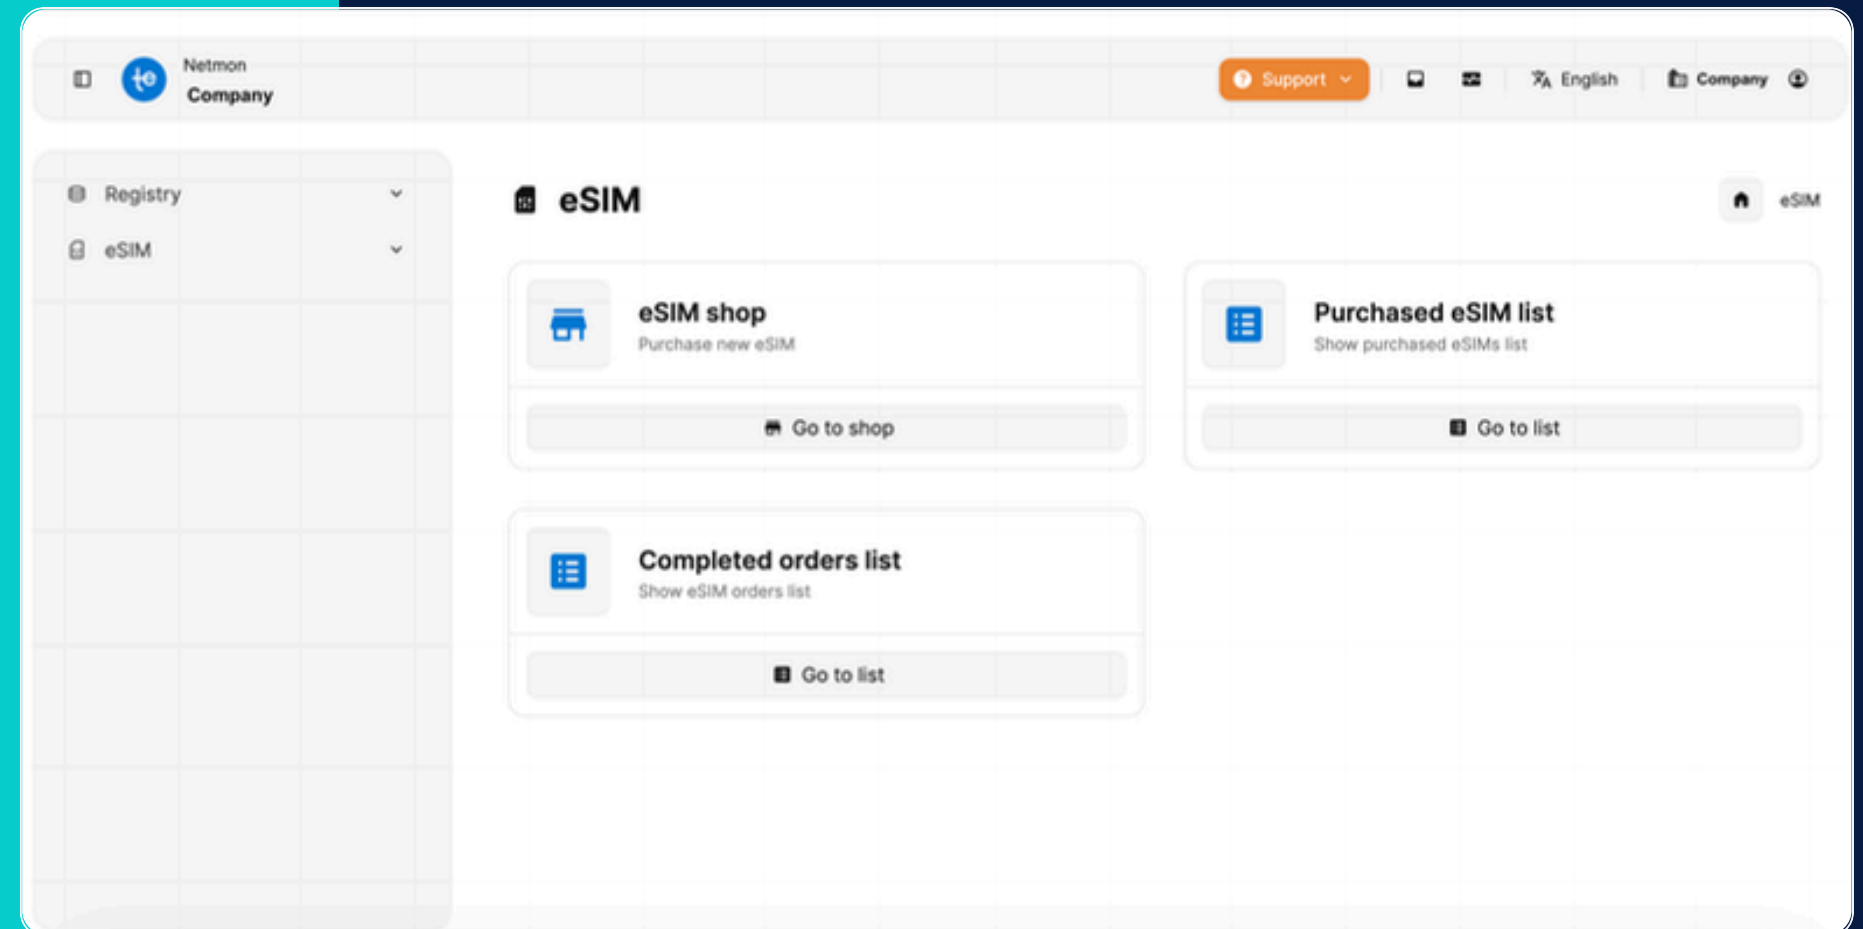

The eSIM module is the new feature from Netmon that allows you to autonomously purchase and manage prepaid data traffic plans for travelling employees.

# The eSIM Module Is Integrated with Netmon

You can purchase data traffic profiles for various destinations, quickly assign the eSIMs to the the employees, and control data usage.

- Direct purchase through the web platform
- Assign the eSIM via email or link
- Monitor data usage
- Track all your purchases
- You can assign the eSIM directly to registered users

# Shop eSIM

Purchase one or more prepaid data traffic profiles based on the desired destination, in real time.

Search for the needed profile by country or country groups

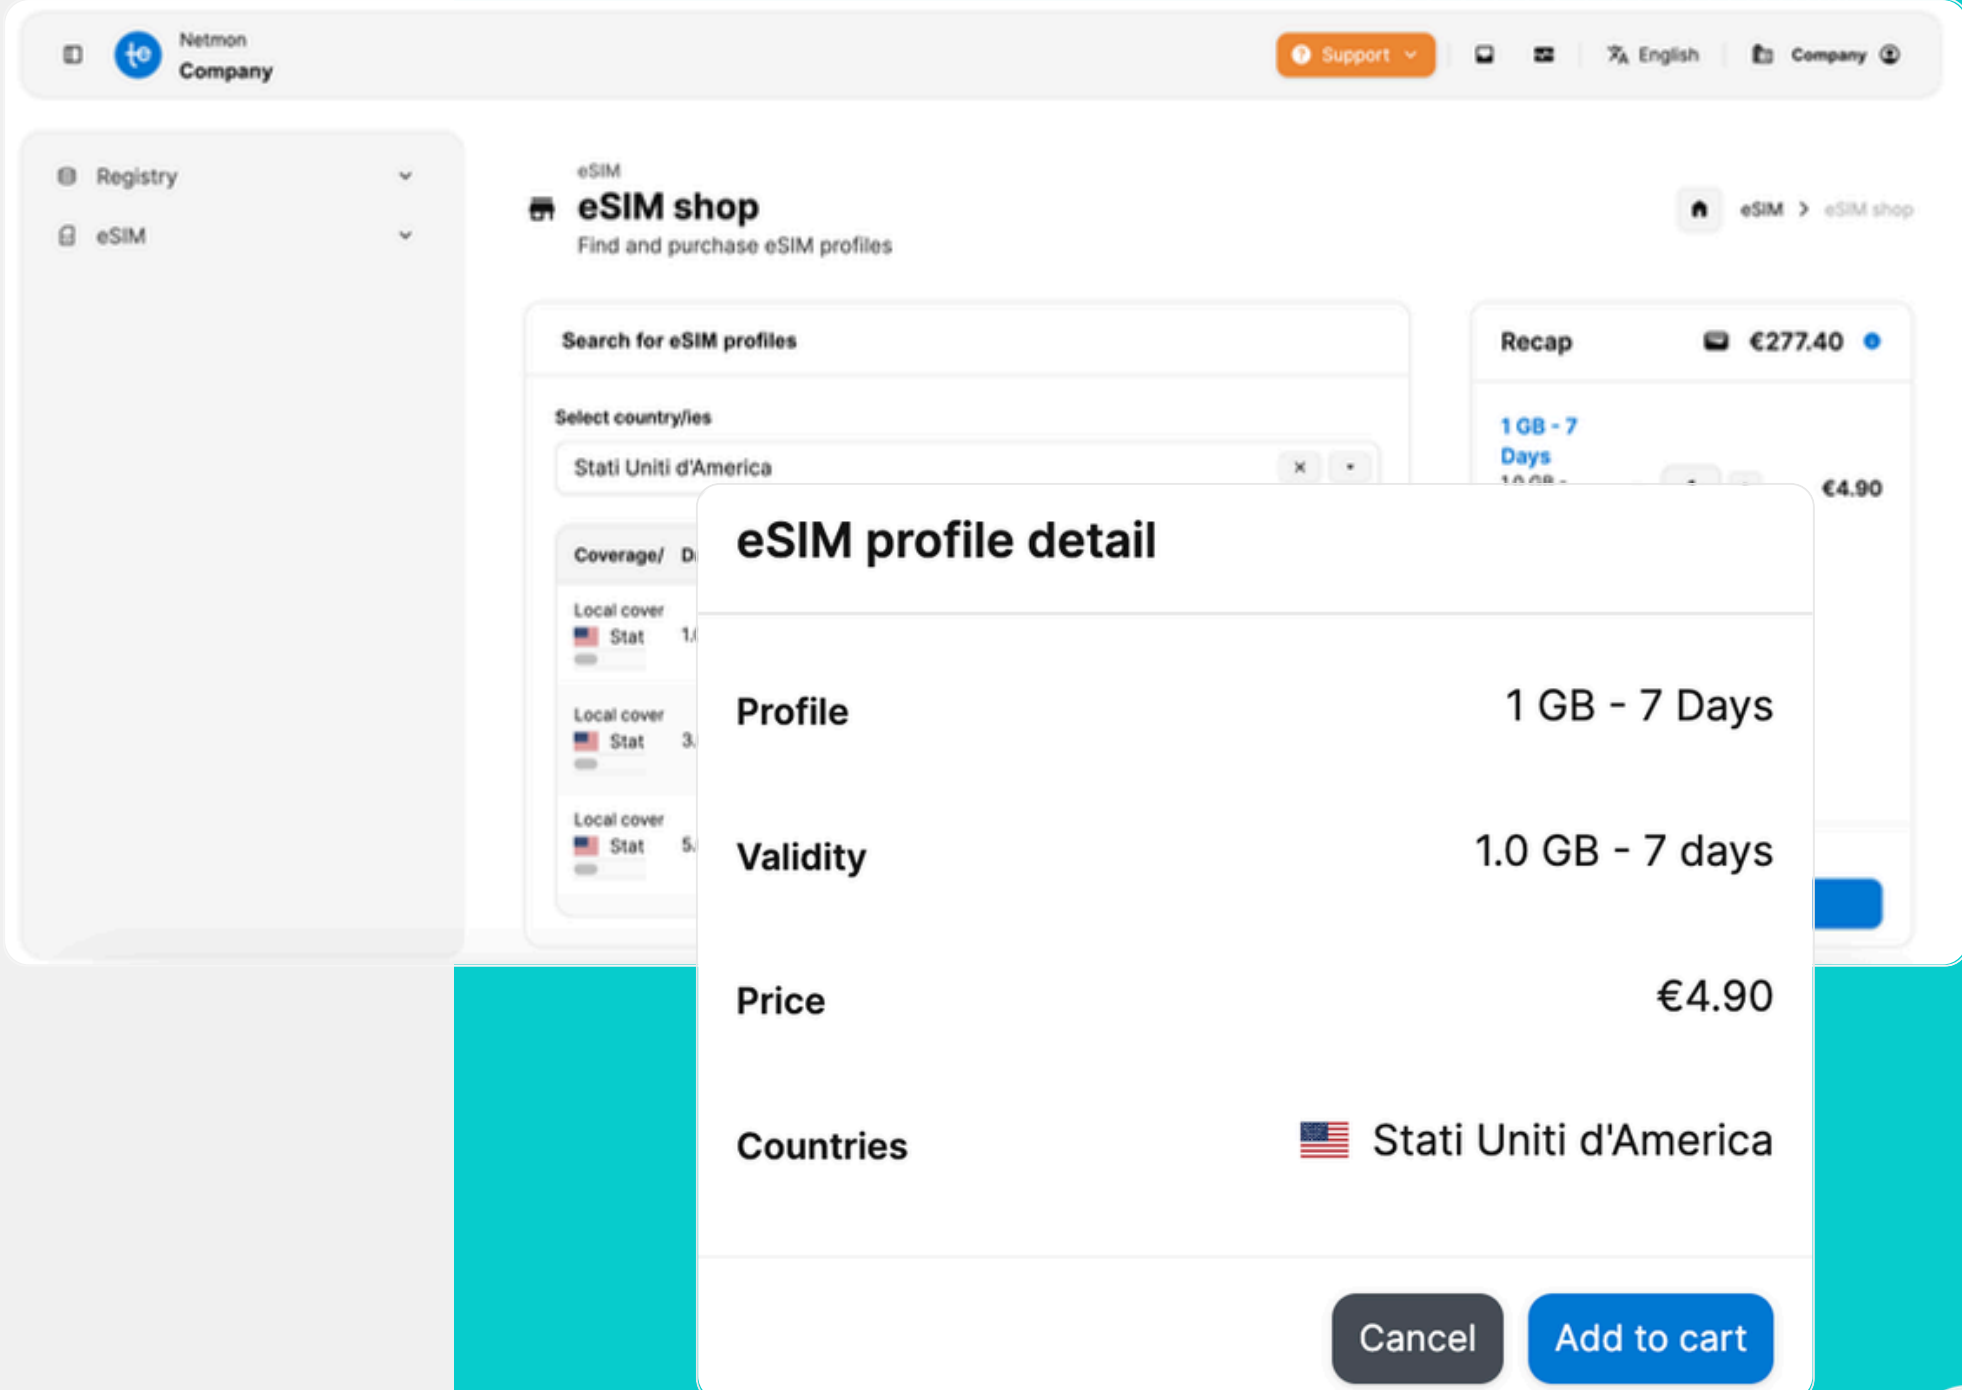

Select the appropriate profile based on the available data traffic (in GB) and the validity period

Add the selected eSIM to the cart

Confirm your purchase

# eSIM List

In the list of purchased eSIMs, you can view the inventory of all purchased profiles, the amount of data available for each eSIM, its status, and the user to whom it is assigned.

Details of the eSIMs

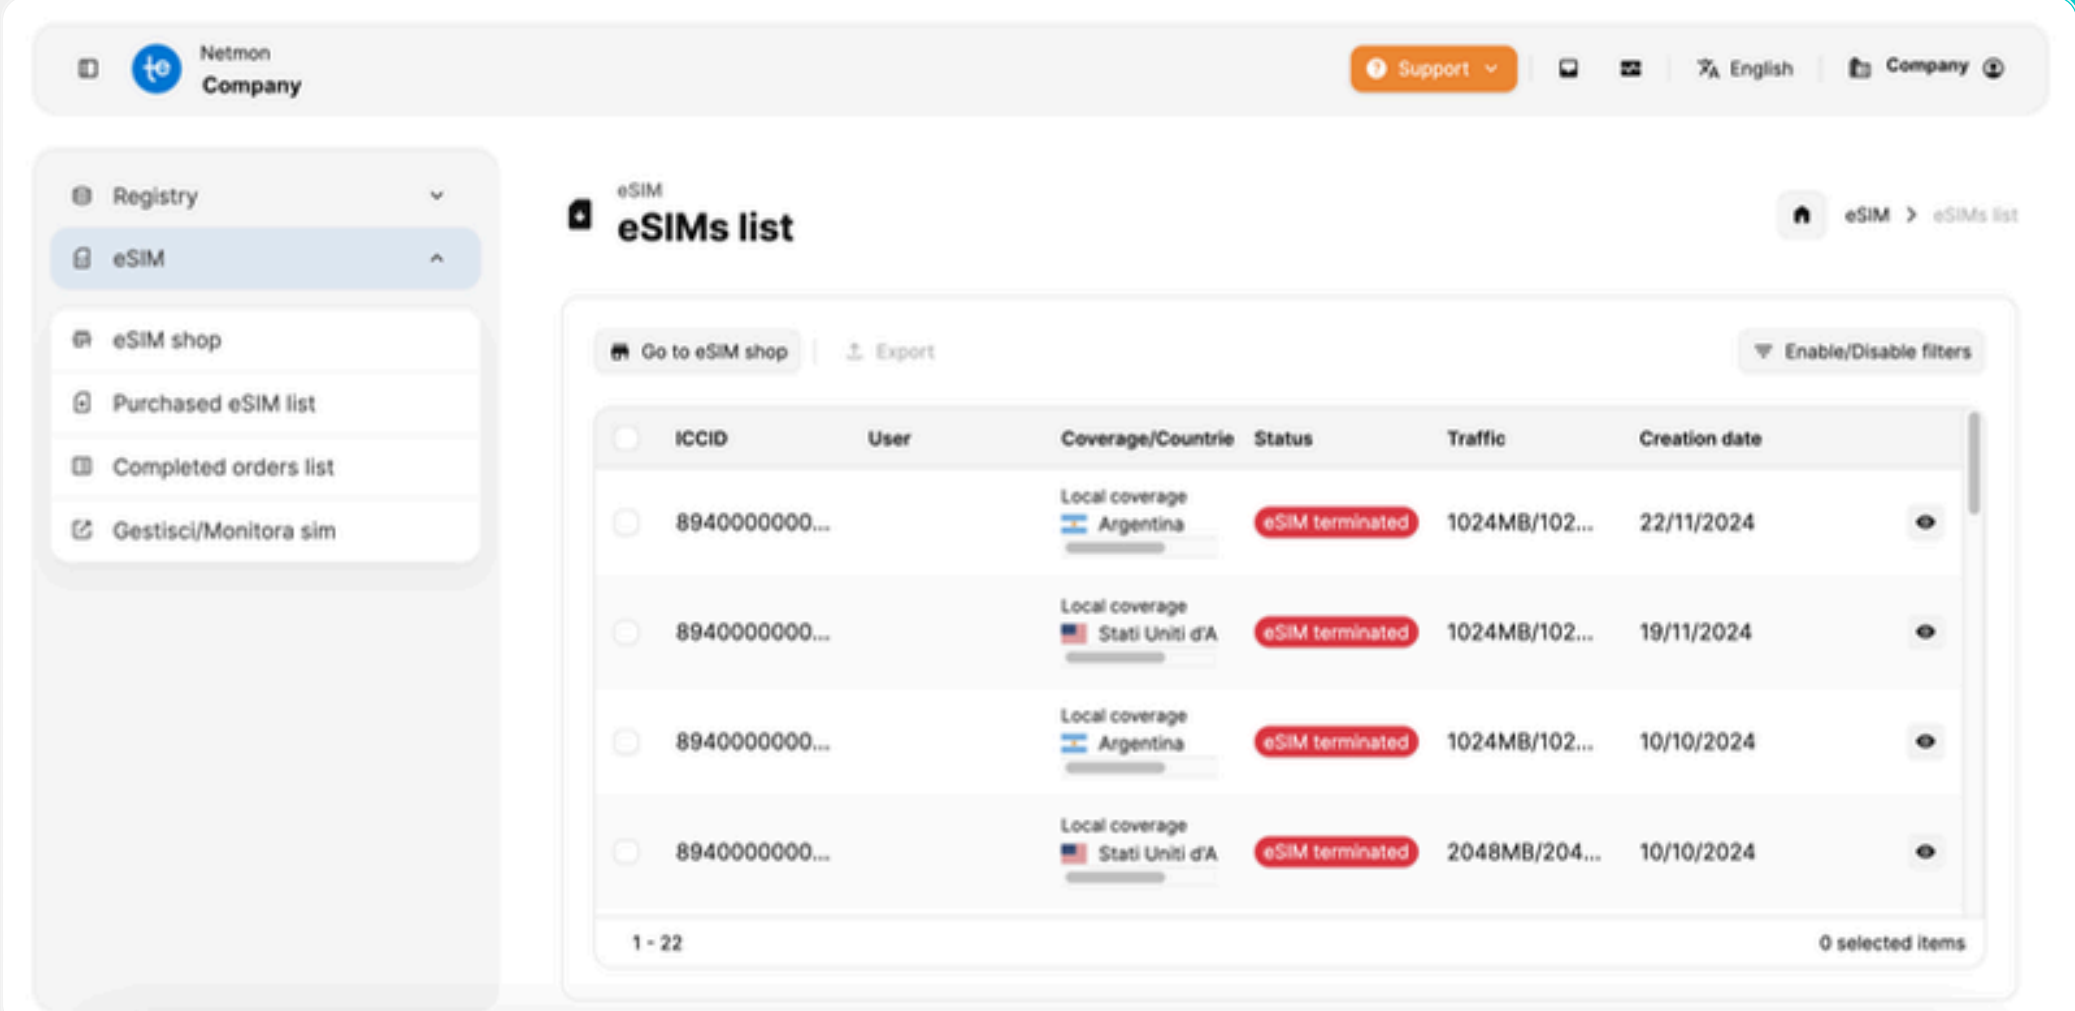

Setup instructions based on the device (QR Code, activation code)

Direct assignment of an eSIM to a registered user

Usage control and ability to recharge eSIM's credit

The screenshot shows the 'eSIMs list' page in the Netmon Company dashboard. The page header includes the company logo, a 'Support' button, and language/region settings. A sidebar menu on the left contains options like 'Registry', 'eSIM', 'eSIM shop', 'Purchased eSIM list', 'Completed orders list', and 'Gestisci/Monitora sim'. The main content area displays a table of eSIM profiles with columns for selection, ICCID, User, Coverage/Country, Status, Traffic, and Creation date. The table shows four rows of terminated eSIMs with various data plans and creation dates. At the bottom, it indicates '1 - 22' items and '0 selected items'.

<input type="checkbox"/>	ICCID	User	Coverage/Country	Status	Traffic	Creation date	<input type="checkbox"/>
<input type="checkbox"/>	8940000000...		Local coverage Argentina	eSIM terminated	1024MB/102...	22/11/2024	<input type="checkbox"/>
<input type="checkbox"/>	8940000000...		Local coverage Stati Uniti d'A	eSIM terminated	1024MB/102...	19/11/2024	<input type="checkbox"/>

# Guided Activation of Profiles on All Devices that Support the eSIMs

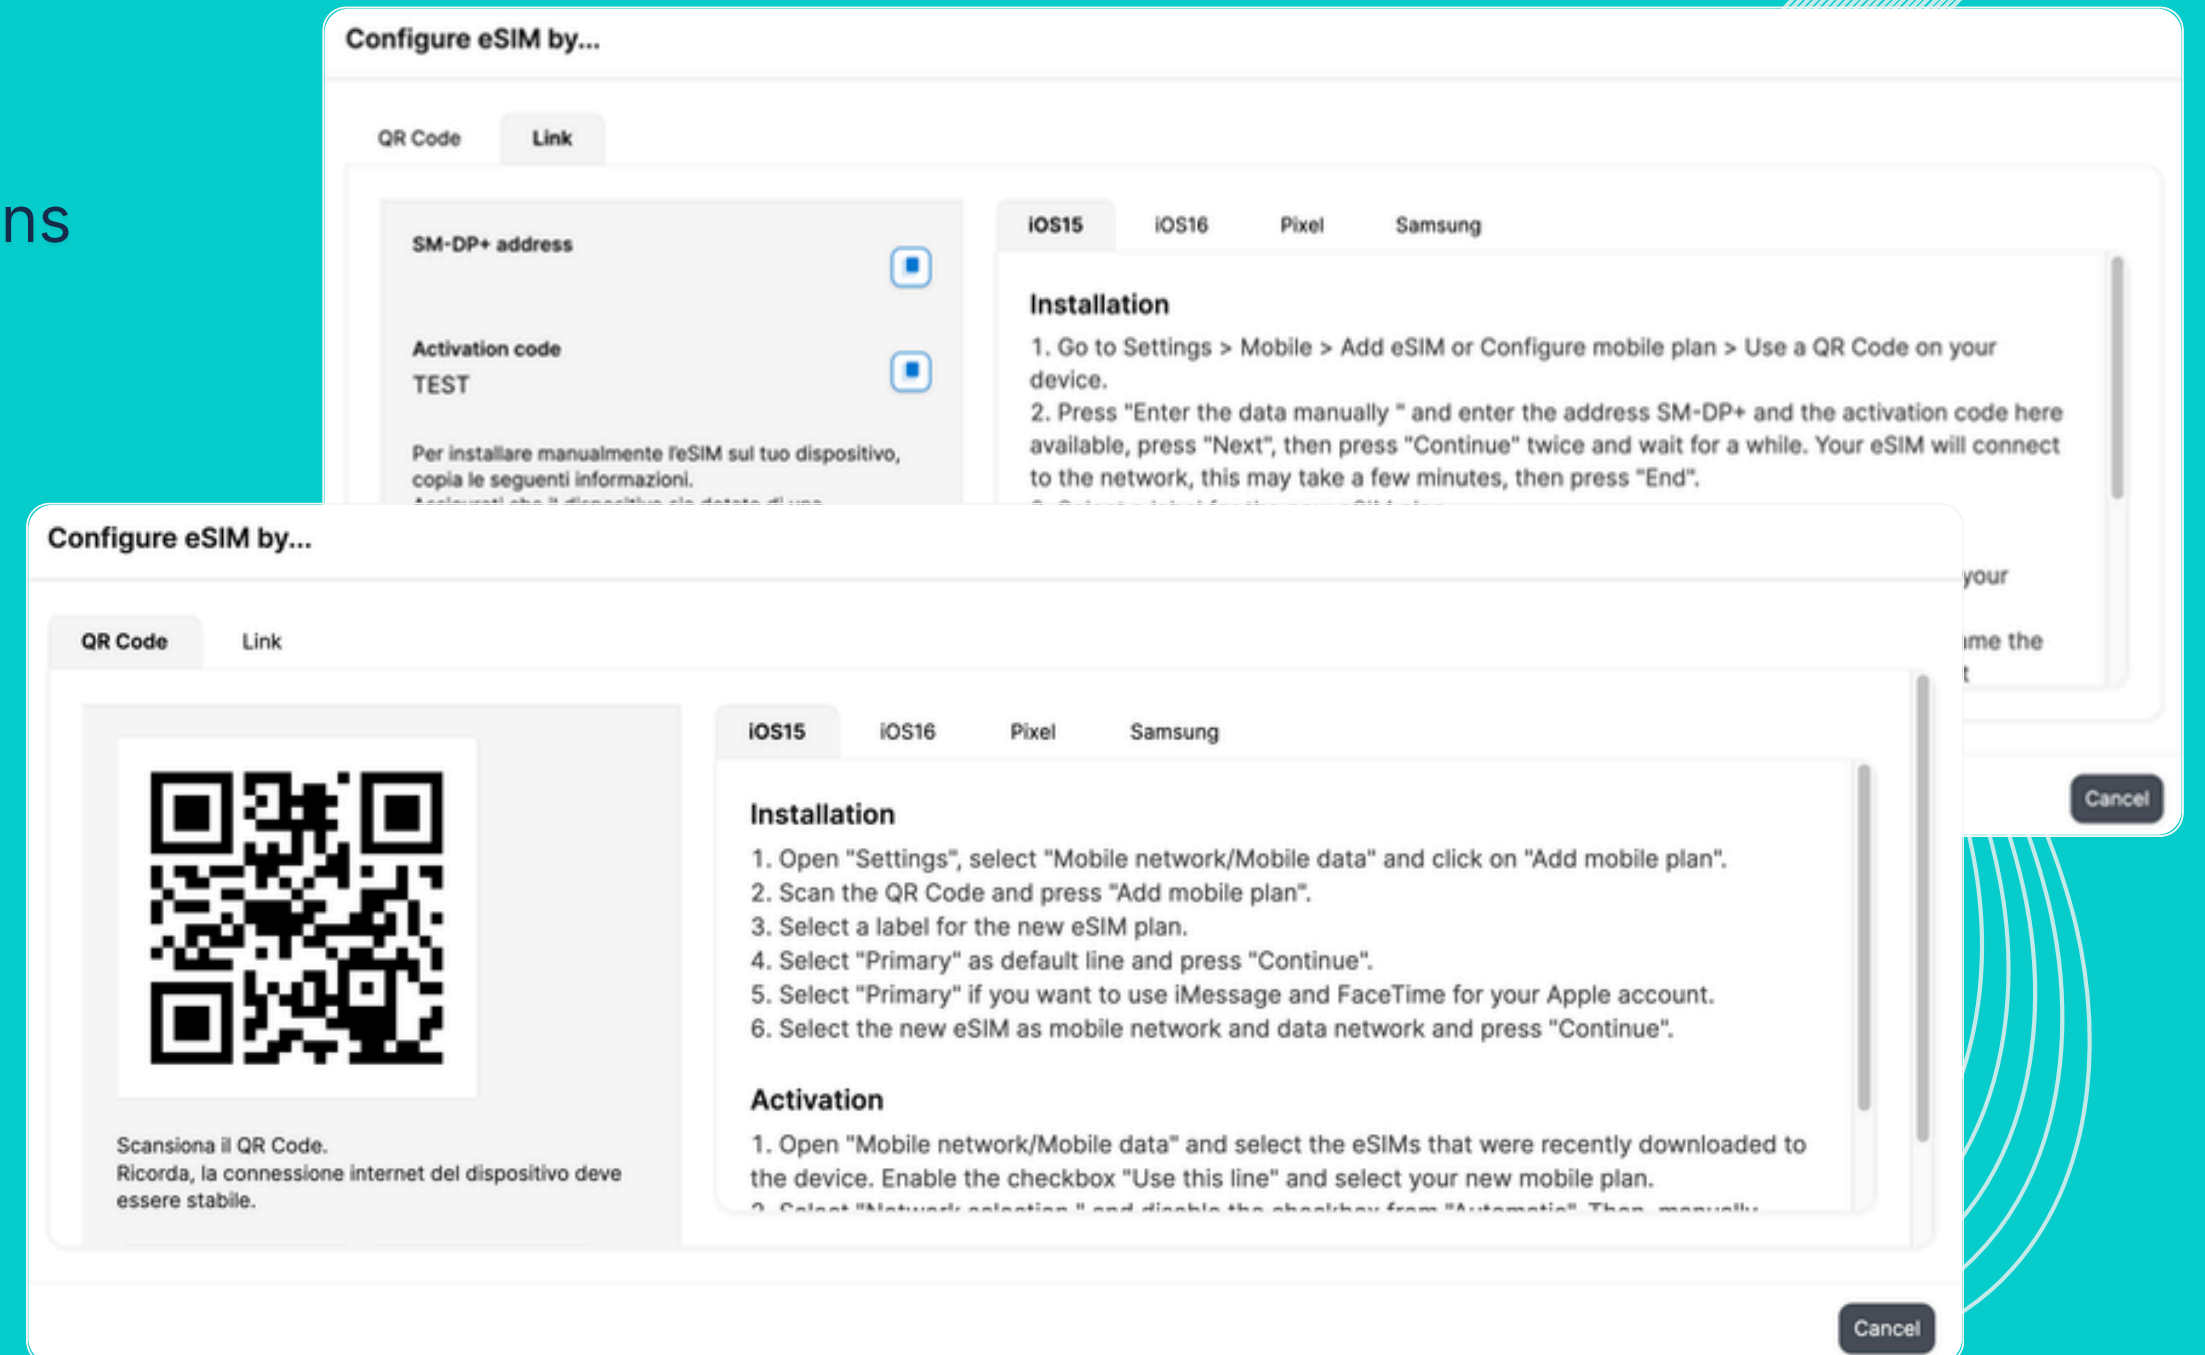

Assign the eSIM by providing all necessary information for installation and activation based on the devices.

# Assigning the eSIM to the User

We provide you with several options to make it easier to send the eSIM and the necessary installation instructions to the end user.

- **Email direct sending by platform to a user already registered**
- **QR Code or link sending via email, external to the platform**
- **Sending a link to the user's device via Chat services if they cannot scan the QR code**

# Advantages

## Easy Management

- Immediate purchase
- Direct assignment to employees
- Full corporate asset management through Netmon Registry integration

## Control and Visibility

- Monitoring the activation status of eSIMs
- Data traffic usage control
- Purchase tracking and spending management
- Ability to send notifications about usage status

## Flexibility and Scalability

- Suitable for all companies that need different temporary data packages
- Opportunity to recharge the traffic for certain profiles
