### EVOLUTION IN MOBILITY

eSIM Module

The eSIM module is the new feature
from Netmon that allows you
to independently purchase and manage
prepaid data traffic plans
for travelling employees.

The eSIM module is integrated with Netmon

You can purchase data traffic profiles for various destinations, quickly assign the eSIMs to the the employees, and control data usage.

- Direct purchase through the web platform
- Assign the eSIM via email or link
- Monitor data usage
- Track all your purchases
- You can assign the eSIM directly to registered users

eSIM Shop

Purchase one or more prepaid
data traffic profiles based on
the desired destination, in real time.

Search for the needed profile
by country or country groups

Select the appropriate profile based on
available data traffic (GB) and validity
period.

Add the selected eSIM to the cart

Confirm your purchase

# Guided Activation of Profiles for All Devices that Support eSIMs

You can assign an eSIM to the employee by providing all necessary information for installation and activation based on their device.

Assigning the eSIM to the user

We provide you with several options to make it easier to send the eSIM and the necessary installation instructions to the end user.

- **Email direct sending by platform to a user already registered**
- **QR Code or link sending via email, external to the platform**
- **Sending a link to the user's device via Chat services if they cannot scan the QR code**
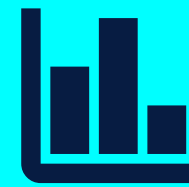

Advantages

Easy management

- Immediate purchase
- Direct assignment to employees
- Full corporate asset management through Netmon Registry integration

Control and visibilty

- Monitoring the activation status of eSIMs
- Data traffic usage control
- Purchase tracking and spending management
- Opportunity to send notifications about usage status

Flexibility and scalability

- Diversified prepaid traffic profiles
- Suitable for all companies that need different temporary data packages
- Opportunity to recharge the traffic for certain profiles
