EVOLUTION IN MOBILITY

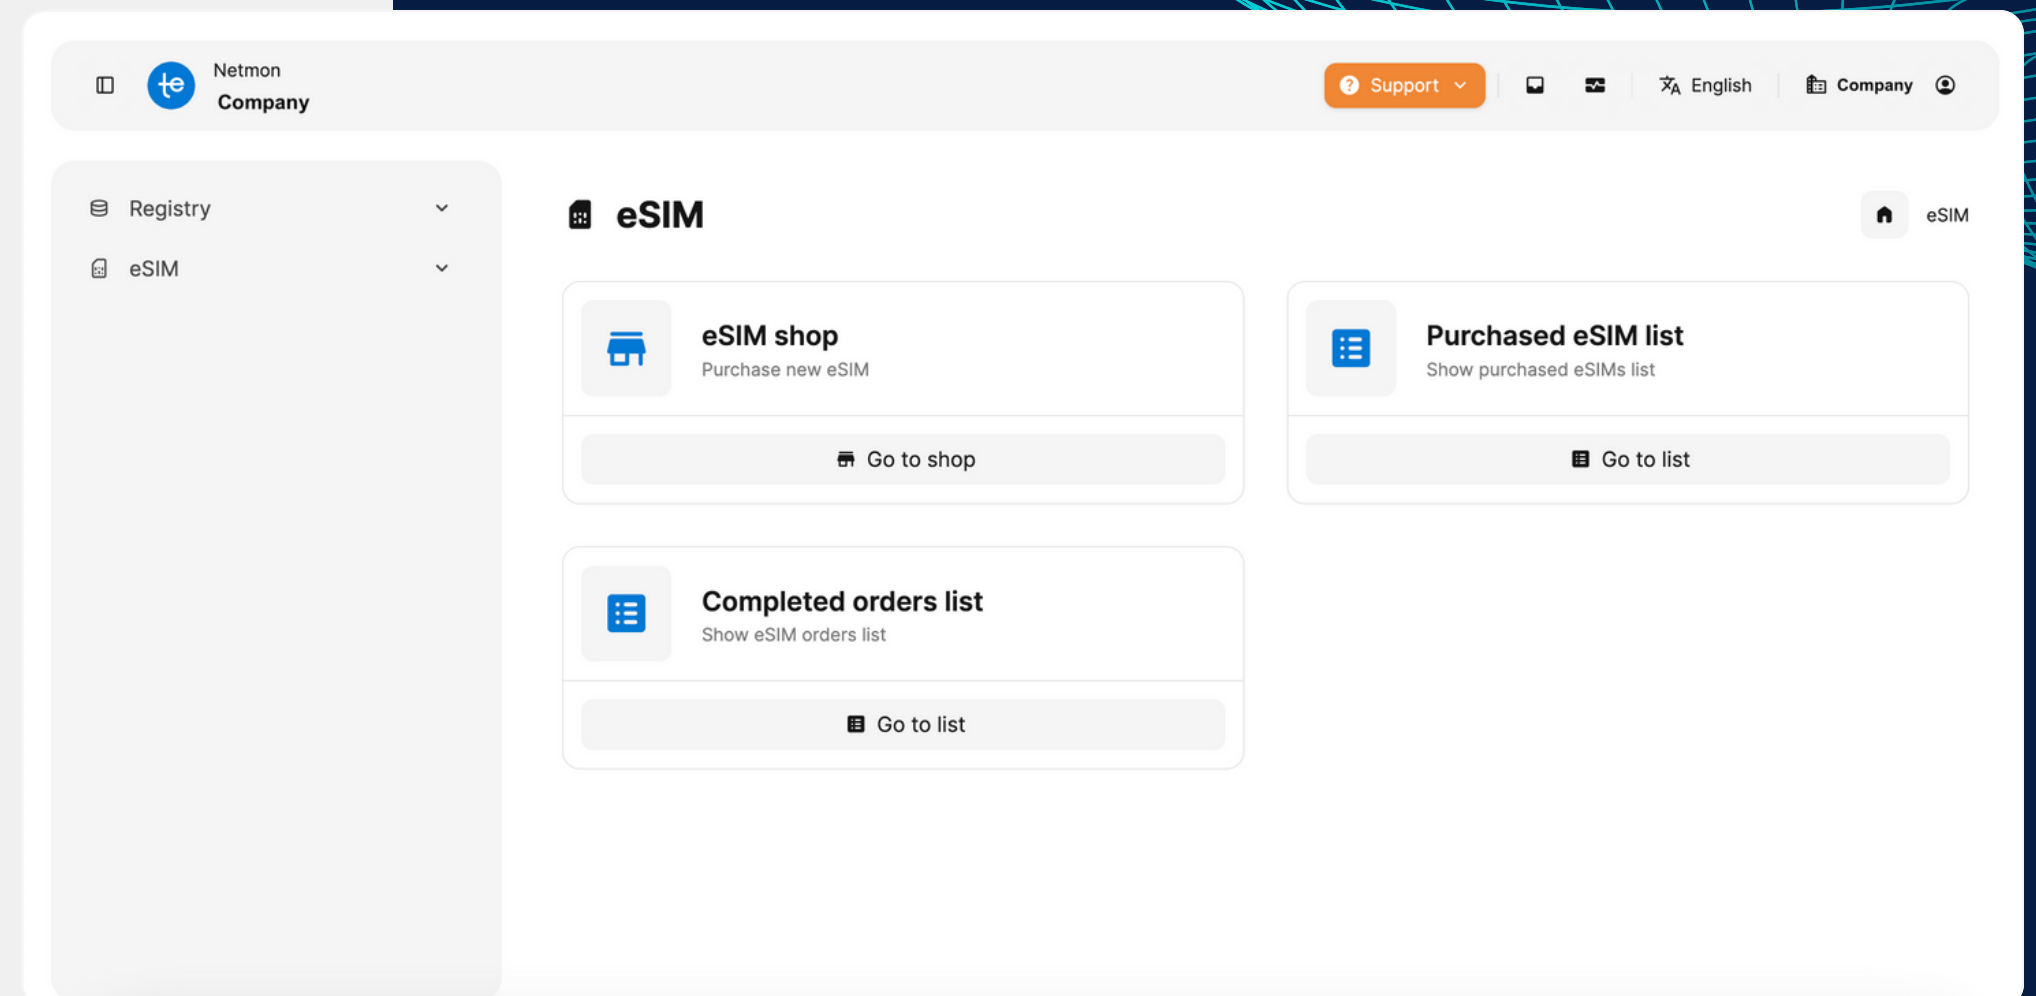

SIM4Business is a solution for companies that allows you to autonomously purchase and manage prepaid data traffic plans for your travelling employees.

Real-time purchases using a prepaid wallet

You can purchase data traffic profiles for various destinations, quickly assign the eSIMs to the the employees, and control data usage.

- Direct purchase through the web platform
- eSIM assignment via email or link
- Data usage monitoring
- Tracking of purchases

Shop eSIM

Purchasing of one or more prepaid data traffic profiles based on the desired destination, in real time.

Searching for the needed profile by country or countries

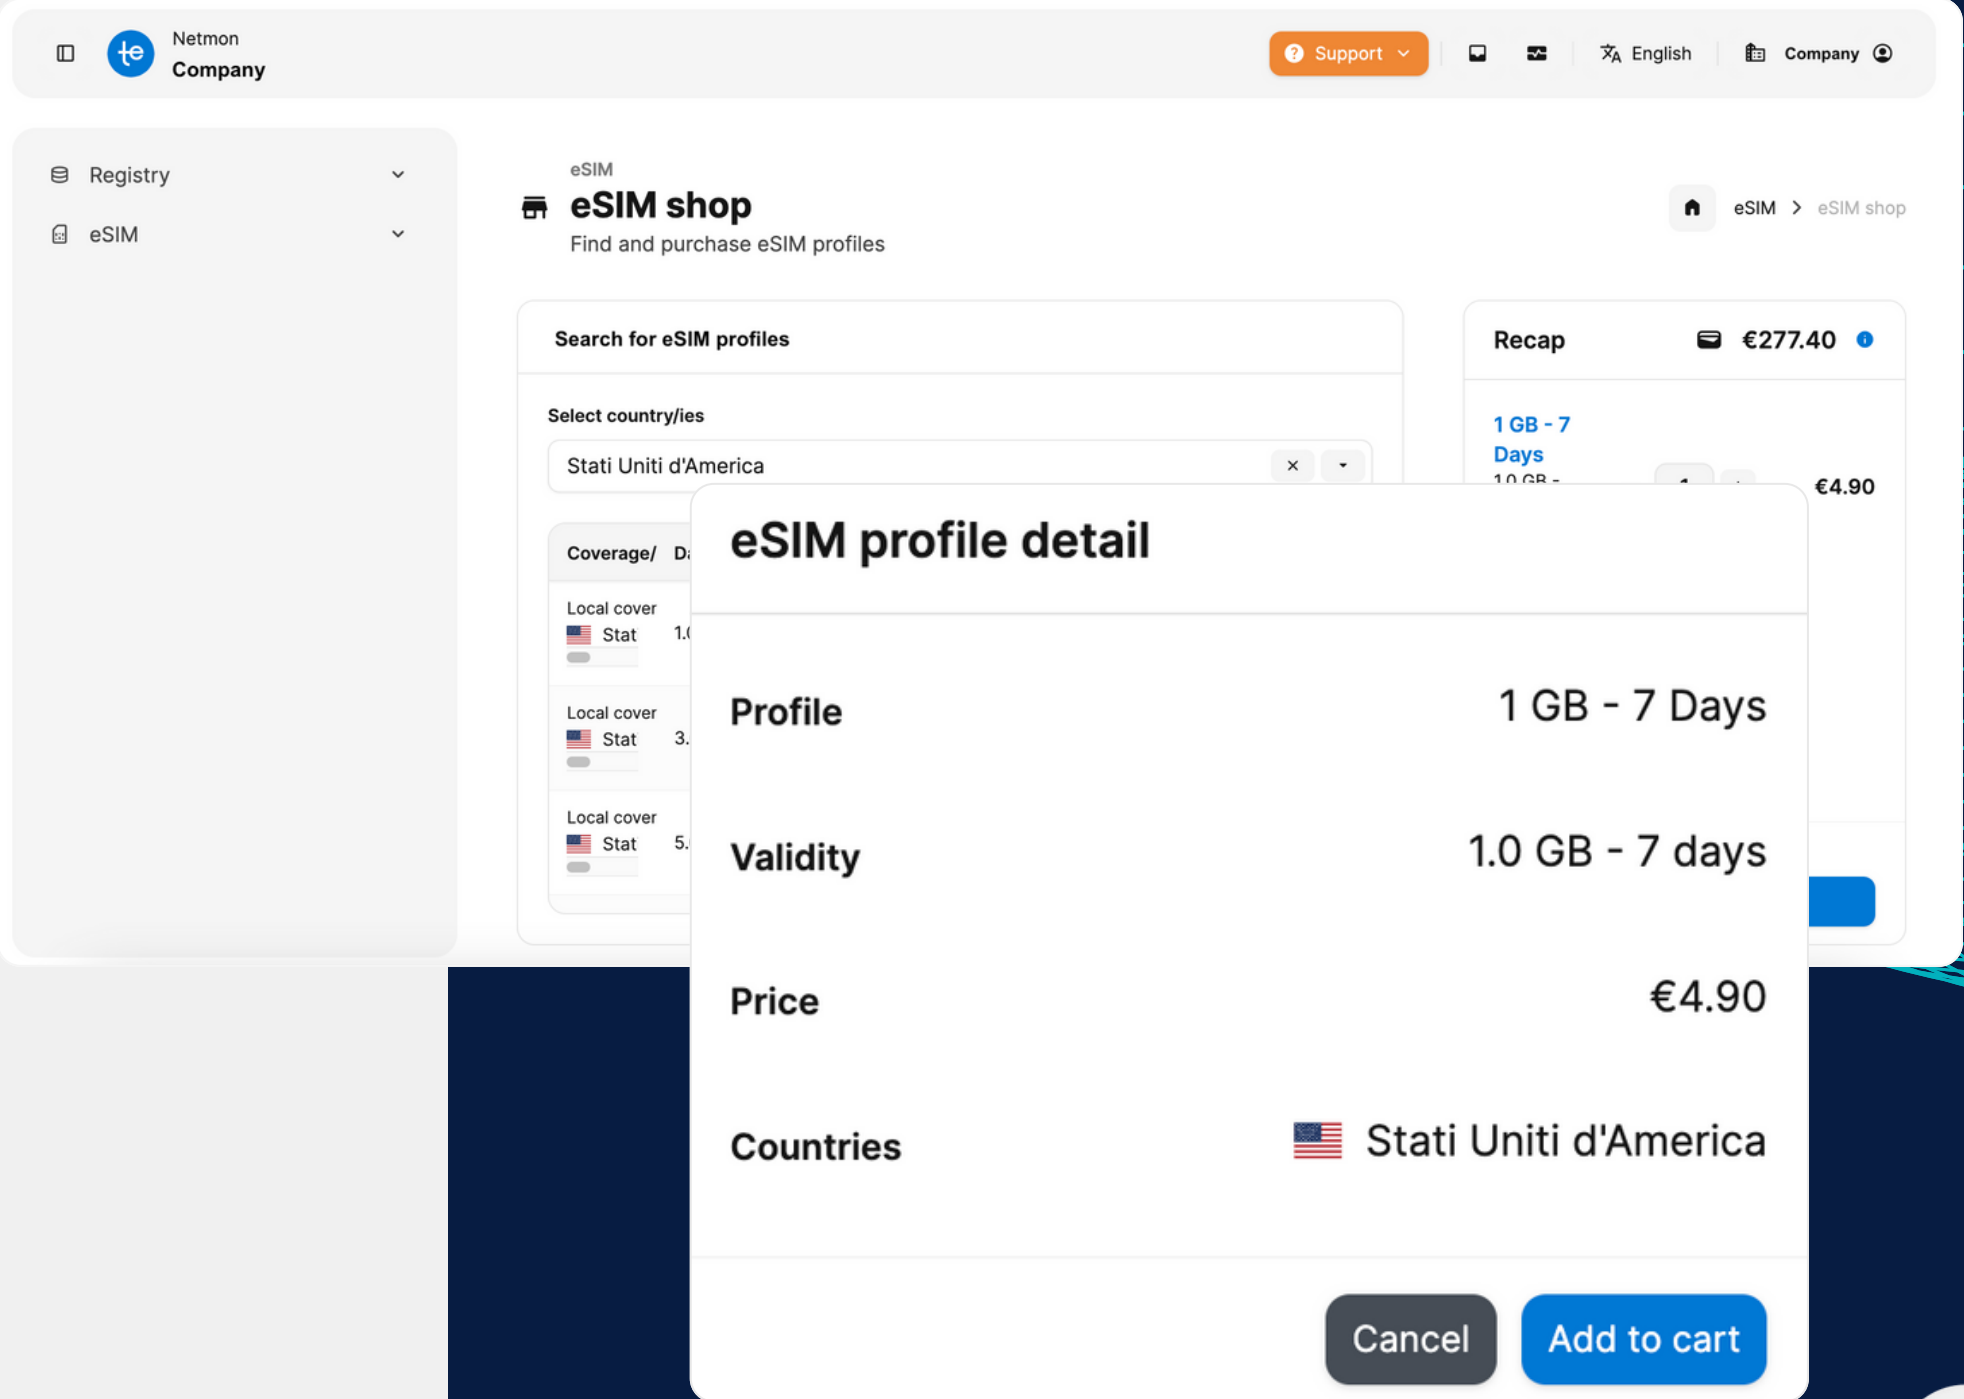

Selection of the appropriate profile based on available traffic (MB) and validity period

Adding the selected eSIM to the cart

Confirmation of the purchase

The screenshot displays the Netmon Company eSIM shop interface. The top navigation bar includes the Netmon Company logo, a support dropdown, and language/company settings. The main content area is titled "eSIM shop" with the subtitle "Find and purchase eSIM profiles". A search bar is present, and a sidebar on the left shows a menu with "Registry" and "eSIM" options. The main area shows a search for "Stati Uniti d'America" with a list of results. A modal window titled "eSIM profile detail" is open, showing the following information:

Profile	1 GB - 7 Days
Validity	1.0 GB - 7 days
Price	€4.90
Countries	 Stati Uniti d'America

At the bottom of the modal, there are "Cancel" and "Add to cart" buttons. In the background, a "Recap" section shows a total of €277.40 and a list of items, including "1 GB - 7 Days" for €4.90.

eSIM List

In the list of purchased eSIMs, you can view the inventory of all purchased profiles, the amount of data available for each eSIM, its status, and the user to whom it is assigned.

Guided activation of profiles on all devices that support eSIMs

Assign the eSIM by sending all the necessary information for installation and activation based on the device.

Assigning the eSIM to the user

We provide several options to make it easier to send the eSIM and the necessary installation instructions to the end user.

- **QR Code or link sending via e-mail, to the user**
- **Sending a link to the user's device via chat services if they cannot scan the QR code**

The image displays two overlapping screenshots of a web interface titled "Configure eSIM by...".

The top screenshot shows the "Link" tab selected. It contains fields for "SM-DP+ address" and "Activation code" (with the value "TEST"). Below these fields, there is a section for "Installation" instructions for iOS15, which includes steps for adding an eSIM via QR code or manual entry. A "Cancel" button is visible at the bottom right.

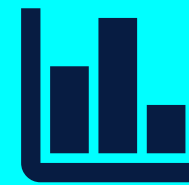

The bottom screenshot shows the "QR Code" tab selected. It features a large QR code. Below the QR code, there is a note: "Scansiona il QR Code. Ricorda, la connessione internet del dispositivo deve essere stabile." To the right, there is a section for "Installation" instructions for iOS15, followed by an "Activation" section with steps for selecting the eSIM and enabling it. A "Cancel" button is also visible at the bottom right.

Advantages

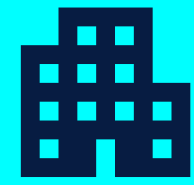

Easy management

- Immediate purchase
- Direct assignment of the eSIMs to employees
- The virtual SIM provides data traffic, allowing employees to keep their own phone number to receive and make calls

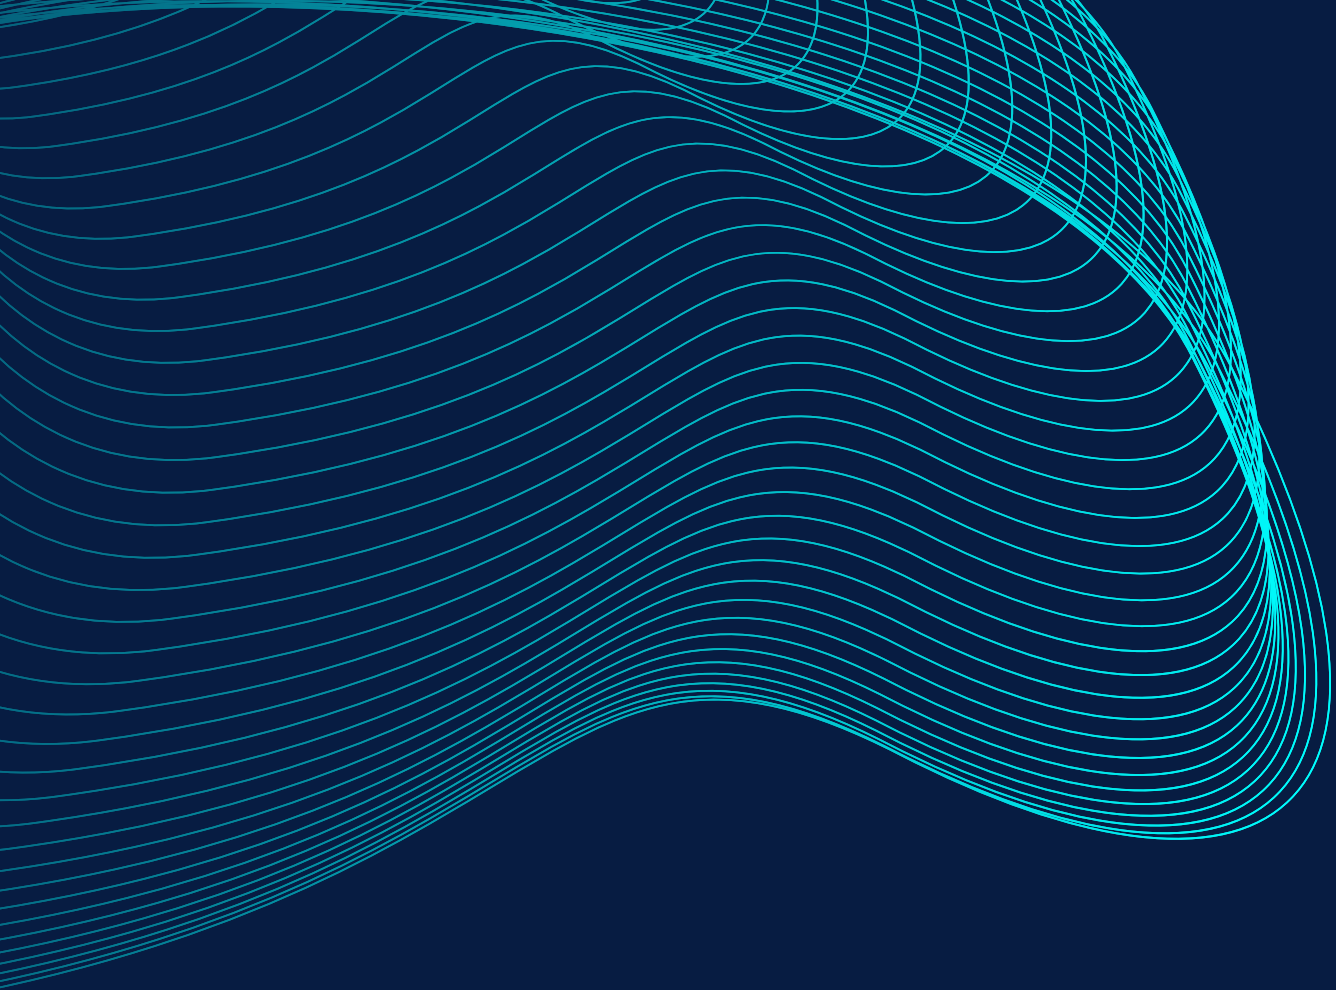

Control and visibility

- Monitoring the activation status of eSIMs
- Data traffic usage control
- Tracking purchases and controlling spending
- Ability to send notifications about usage status

Flexibility and scalability

- Diversified prepaid traffic profiles
- Suitable for all companies that need various temporary data packages
- Opportunity to recharge the traffic for certain profiles
